

PROJECT AND JOB MANAGEMENT

From project brief to outcome. Keep every project readable.

Portfolios, WBS plans, timelines, activities and recorded hours in one cloud workspace — project control that stays connected to how work actually gets delivered.

Project portfolio

Searchable, filterable views of open, closed and attention-needed work — with health indicators and deadlines.

WBS & timeline

Hierarchical plans with Gantt-style timelines — milestones, phases, activities, responsibility and progress.

Board & activity

Kanban by workflow status, plus project history and audit context to reconstruct the journey.

Timesheets

Day, week and month views by project and WBS activity — hours land where the work is.

Connected control

Shared customers, people and taxonomy with the Nebulas platform — nothing retyped.

Built for billable work

Client jobs in the same workspace — effort connected to the work it belongs to.

One continuous loop

01

Identify

Objectives, phases, responsibilities.

02

Plan

A WBS and timeline everyone can read.

03

Follow

Boards and statuses keep delivery visible.

04

Verify

Progress and hours close the loop.

Make every project readable.

Show us one live project — we'll show you its portfolio, plan, board and hours in Nebulas Projects.
